

BEYOND CLEANABLE

Keeping surfaces clean is more important than ever, and it has always been important to Crypton. But Crypton goes beyond clean.

Crypton Fabric offers multi-tiered defense with a 5-year warranty, its antimicrobial & stain-resistant technology and an integrated, permanent liquid barrier. Crypton's patented moisture barrier is proven to prevent solids and liquids from permeating to the cushion below – allowing Crypton fabric to be cleaned and disinfected.

Clean is good but disinfected is better.

While cleaning and disinfecting are sometimes performed in the same step, there are noteworthy differences. Cleaning is the apparent removal of liquid and food contaminants, while disinfecting is the elimination / killing of microorganisms that can survive in the presence of moisture and food sources that are not visible to the human eye. It is possible for a surface to appear clean but not be disinfected.

Crypton's EPA-approved Disinfectant & Deodorizer with Crypton Barrier Fabrics is an engineered system of disinfection for high-use, high-abuse settings. EPA-registered, one-step disinfectant cleaner, Crypton's Disinfectant is effective against a broad spectrum of bacteria, viruses, mold, mildew and fungus, and disinfects hard, non-porous surfaces including Crypton barrier fabrics.

Is it effective against COVID-19? Yes. The EPA has announced its Emerging Pathogen Policy which states that since our disinfectant kills a similar 'common corona virus' it is thought to kill the emerging (new) pathogen.

To disinfect Crypton, the Disinfectant & Deodorizer must remain on the fabric for a period of time. The time required varies the type of microorganism, though 5 to 10 minutes is best. Directions to clean and disinfect Crypton fabric with liquid barrier with its EPA-registered Disinfectant:

1. Remove spills with an absorbent cloth or paper towel. If needed, clean heavily soiled areas with soap and water.
2. Remove excess moisture and soap via vacuum extraction or wiping with a clean, dry cloth. Remove all soap so that it does not attract soil
3. Apply Crypton's Disinfectant & Deodorizer 6-8 inches from surface (and please do not inhale)
4. Allow surface to remain wet for 10 minutes for best results
5. After 10 minutes, wipe dry or allow to air dry
6. Rinse hard, non-porous food contact surface with water after application.

Crypton offers the ability to clean and disinfect your fabric – ensuring permanent resistance to odors, mold and mildew, making Crypton the sustainable choice to help protect both your environment and your investment.
